Who are we ?

Since 1999, **Power System®**, a key player and a great agitator in the automotive world, has been a creator of new technologies. The company has always been committed to innovating and improving its products, which are intended for both automotive professionals and private individuals.

Power System® has solidly built its foundations on the quality of its products, its close-knit team and its technology, which is what has made its longevity. The **Power System®** Company, located in Wasquehal, in the Hauts de France region, has registered several patents:

KEY DATES

An innovative process

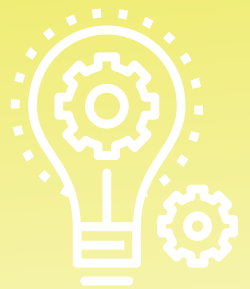

Why use the Flash Cooling® FC 1515 ?

- › Specially designed to perform coolant change, drain and purge operations on all light vehicles up to 15L.
- › Compatible with all gasoline, diesel, electric or hybrid engines.

Description

- › Drain, flush and replace coolant in minutes, without disassembly.
- › Possibility to reuse the sucked liquid.
- › Station equipped with 2 tanks of 15 liters each.
- › Robust, light and very practical station.
- › Completely independent station that operates from a compressed air source and does not require a power supply.

Save time
Save money

Quickly

Drain and replace coolant with a **complete drain in 5 minutes. No disassembly required.**

Efficient

No need to worry about draining or disassembling hoses, **the station takes care of the entire process** of draining, filling and complete purging.

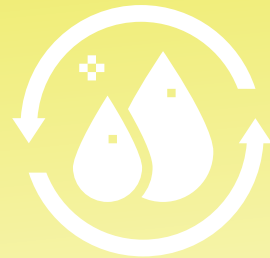

Respect for the environment

Clean

No mess in the workshop and no coolant under the vehicle

Ecological

Environmentally friendly recovery and recycling of used fluids without polluting the ground thanks to mobile tanks.

Characteristics FC 1515

Type of supply › Compressed air

Tank capacity › 2 x 15 L

Operating time › From 5 minutes

Dimension (L x W x H) › 59,5 x 52 x 115 cm

Weight › 35 kg

A service to offer to your customers

A simple offer

All car manufacturers recommend **changing the coolant regularly**. But they rarely propose it because it is too constraining and tedious, although it is essential for the engine.

With Flash Cooling®, changing the coolant is now child's play.

- › Change your customer's coolant in **record time**.
- › Drain the coolant at the same time you replace a part.
- › No noise, no compressed air. **A simple plug is all you need.**
- › Saves time, keeps the **shop clean**, and allows for easy and complete recycling of used fluids.
- › **Save money** quickly with a service that takes **5 minutes (fixed price of € 69)***.
- › Easy to use, 100% efficiency guaranteed.
- › No qualified personnel required.

*Recommended price

Efficiency and Profitability

Compatible with hybrid and electric vehicles

The innovative **Flash Cooling®** machine is compatible with all vehicles: gasoline, diesel, hybrid and electric.

Easily increase your revenue

Request a fixed price for coolant replacement.

Save on manufacturer's scale time for coolant parts replacement (water pump, hose, radiator).

Available for purchase or rental

The **Flash Cooling® FC 1515** is available for purchase or rental. Please contact us for more information.

DID YOU KNOW?

Check the pH of the coolant and antifreeze.

- › Used coolant gets dirty, loses its properties and the antifreeze, although the color does not change.
- › Over time, the pH of the fluid decreases and becomes more acidic, causing rust and deterioration of engine cooling components. **If is less than 7, it is essential to change the coolant.**
